-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

The misnumbered claim 9, which follows claim 13, been renumbered as claim 14.

2. Claim 1 is objected to because of the following informalities: In the last line of claim 1 "the ... channel" should be "the ... channels". Appropriate correction is required.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-8, and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Andersson (WO 01/67021).

Andersson discloses a heat exchanger equipped with several tray shaped plates (1) which are placed on top of one another, are sealed together on their peripheral edges (at 24) and are provided with passages (11, 22, 23), where passages lying essentially above one another form a continuous flow channel

Art Unit: 3744

that traverses the plates and where flow channels lying adjacent to one another are traversed by different media from an admission side to a discharge side (Fig. 1), the flow channel having an elongate cross section, the flow channel being oval (12) or rectangular (22 or 23), adjacent flow channels (22 and 11) having different cross sectional shapes (Fig. 1), the heat exchanger being capable of use as a stacked plate cooler for a vehicle.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4, 9, 13, and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Andersson (WO 01/67021).

Andersson discloses a heat exchanger as claimed, but does not specify the length to width ratio of a passage. However, the passages of Andersson appear to meet the specified length to width ratio (see Figs. 1, 6, 7). Alternatively, if the passages of Andersson are not considered to meet the specified length to width ratio, it would have been obvious to one of ordinary skill in the art to use any desired length to width ratio for the passages to be determined by the intended use of the device.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hasegawa et al, Kull et al, and Takigawa et al are cited to show plate heat exchanger structure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
